**YOUNG Researchers' Conference Materials Science and Engineering (20 ; 2022 ; Beograd)**

Programme ; and the Book of Abstracts / Twentieth Young Researchers' Conference Materials Science and Engineering, November 30 % December 2, 2022, Belgrade, Serbia ; [organized by] Materials Research Society of Serbia [and] Institute of Technical Sciences of SASA ; [editor Smilja Marković]. - Belgrade : Institute of Technical Sciences of SASA, 2022 (Beograd : Gama digital centar). - XXI, 98 str. ; 23 cm

Tiraž 120. - Registar.

ISBN 978-86-80321-37-0

1. Društvo za istraživanje materijala Srbije (Beograd) 2. Institut  
tehničkih nauka SANU (Beograd)

a) Наука о материјалима - Апстракти b) Технички материјали - Апстракти

COBISS.SR-ID 80584457

## Aim of the Conference

Main aim of the conference is to enable young researchers (post-graduate, master or doctoral student, or a PhD holder younger than 35) working in the field of materials science and engineering, to meet their colleagues and exchange experiences about their research.

## Topics

Biomaterials  
Environmental science  
Materials for high-technology applications  
Materials for new generation solar cells  
Nanostructured materials  
New synthesis and processing methods  
Theoretical modelling of materials

## Scientific and Organizing Committee

### Committee President

Smilja Marković                      Institute of Technical Sciences of SASA, Belgrade, Serbia

### Vice-presidents

Dragana Jugović                      Institute of Technical Sciences of SASA, Belgrade, Serbia  
Magdalena Stevanović              Institute of Technical Sciences of SASA, Belgrade, Serbia  
Dorđe Veljović                        Faculty of Technology and Metallurgy, Belgrade, Serbia

### Members

Tatiana Demina                        Enikolopov Institute of Synthetic Polymeric Materials,  
Russian Academy of Sciences  
Jasmina Dostanić                      Institute of Chemistry, Technology and Metallurgy, Belgrade,  
Serbia  
Xuesen Du                                Chongqing University, Chongqing, China  
Branka Hadžić                          Institute of Physics, Belgrade, Serbia  
Ivana Jevremović                      Norwegian University of Science and Technology, Trondheim,  
Norway  
Sonja Jovanović                        Institute of Nuclear Sciences “Vinča”, Belgrade, Serbia  
Snežana Lazić                          Universidad Autónoma de Madrid, Spain  
Lidija Mančić                         Institute of Technical Sciences of SASA, Belgrade, Serbia  
Marija Milanović                      Faculty of Technology, Novi Sad, Serbia  
Miloš Milović                          Institute of Technical Sciences of SASA, Belgrade, Serbia  
Nebojša Mitrović                      Faculty of Technical Sciences, Čačak, Serbia  
Irena Nikolić                            Faculty of Metallurgy and Technology, Podgorica, Montenegro  
Marko Opačić                          Institute of Physics, Belgrade, Serbia  
Vuk Radmilović                        Faculty of Technology and Metallurgy, Belgrade, Serbia  
Tatjana D. Savić                        Institute of Nuclear Sciences “Vinča”, Belgrade, Serbia  
Ana Stanković                          Institute of Technical Sciences of SASA, Belgrade, Serbia  
Srečo Škapin                            Institute Jožef Stefan, Ljubljana, Slovenia  
Boban Stojanović                      Faculty of Sciences, Kragujevac, Serbia

Ivana Stojković-Simatović Faculty of Physical Chemistry, Belgrade, Serbia  
Konrad Terpiłowski Department of Interfacial Phenomena, Institute of Chemical Sciences, Faculty of Chemistry, Maria Curie-Skłodowska University in Lublin, Poland

Vuk Uskoković TardigradeNano, Irvine, CA, USA  
Rastko Vasić Faculty of Physics, Belgrade, Serbia  
Ljiljana Veselinović Institute of Technical Sciences of SASA, Belgrade, Serbia  
Siniša Vučenović Faculty of Sciences, Department of Physics, Banja Luka, B&H  
Marija Vukomanović Institute Jožef Stefan, Ljubljana, Slovenia

Conference Secretary

Ivana Dinić Institute of Technical Sciences of SASA, Belgrade, Serbia

### Conference Technical Committee

Aleksandra Stojičić, Marina Vuković, Željko Mravik, Katarina Aleksić, Jelena Rmuš

### Results of the Conference

Beside printed «Programme and the Book of Abstracts», which is disseminated to all conference participants, selected and awarded peer-reviewed papers will be published in journal “Tehnika – Novi Materijali”. The best presented papers, suggested by Session Chairpersons and selected by Awards Committee, will be proclaimed at the Closing Ceremony. Part of the award is free-of-charge conference fee at YUCOMAT 2023.

*In vivo* measurements of the optical properties of plant leaves, by spectrophotometric methods, could potentially provide very useful information considering plant's health. This research is focused on developing nondestructive optical processing method to obtain useful information for overall plant health evaluation. The analyses of the leaf spectroscopy (in the broad wavelength range) is well present in majority of the literature. The absorption spectra of chloroplast pigments provide clues to the relative effectiveness of different wavelengths for driving photosynthesis, since light can perform work in chloroplasts only if it is absorbed. This experimental procedure describes a novel experimental setup that enables continuous measurements of the optical reflection and transmission coefficients of broad-leaved plants. For each of 20 channels, the source of light is a red Signal LED with the spectral emission maximum at 665 nm. Special attention is given to the development of data collection software, as well as procedures for calibration of the measuring processing system and handmade methyl methacrylate leaf holders. Monitoring the evolution of the plant activity in real-time has resulted in the graph of the spectral Circadian rhythm as a function of time. Signatures from spectroscopic optical imaging could be successfully used to track nutritional disorders before visual symptoms are observed. The setup was tested on: *Ocimum basilicum* L. (the plants were grown in the hydroponics); *Phaseolus vulgaris* L., *Zea mays* L. (seeds were germinated in commercial humus), *Guzmania lingulata* (L.) Mez, *Vriesea carinata* Wawra, variegated *geranium* (L.) L'Hér. etc. The condition of the plants under test was assessed by the more common (destructive) methods such as: measurements of the determination of the photosynthetic pigment content, dry weight determination and the efficiency of PSII. Several biological parameters were observed, calculated and compared to the graphs of optical transmission dependence in real time. Currently, we are focused to update knowledge about fast and subtle changes in chloroplast movements during dark-light-dark transition and to relate different location of chloroplast to their photosynthetic capacity.
